MATERNITY

www.anita.com/maternity

Find the right size for your customer following our step-by-step guide

When it comes to bras, base your measurements on a well-fitting bra, preferably one without underwires.

The measured size serves as a guideline. The actual size for the best comfort of each customer can only be determined by trying the item on!

Underbust measurement (1)

Take the measurement by holding the tape directly under the bust. This measurement determines the bra size.

Bust measurement

Take the bust measurement (2) by holding the tape horizontally over the widest point of the breast.

Use the chart to find out the cup size

Pants size

To work out the pants size, measure the waist (3) by holding the tape horizontally around the smallest part of the waist. Measure the hips (4) by holding the tape horizontally around the widest part of the hips.

If there is a considerable difference between the waist and hip measurement, always take the larger size.
